WORK EXPERIENCE

Internship - Angular JS

Jan 2022 - Jun 2022

Toshal Infotech Pvt. Ltd.

An AngularJS Internship at Toshal Infotech offers hands-on experience in developing web applications using AngularJS, a popular JavaScript framework. Interns work under the guidance of experienced professionals, learning to create dynamic and responsive web interfaces. The program typically focuses on front-end development, covering topics like components, data binding, modules, pipes, architecture, routing, and life cycle.

Learning React JS

May 2024 - Present

Tops Technologies

The React JS Course at Tops Technologies is designed to equip students with comprehensive skills in building dynamic and high-performing web applications using React.js, a leading JavaScript library for front-end development. The course covers key concepts such as components, state management, props, hooks, and routing. Students gain hands-on experience through practical projects, learning how to create interactive user interfaces and manage application states effectively.

PROJECTS

E-commerces Website

Technology : HTML, CSS, Bootstrap, JavaScript

Functionality : In this project, I developed both the front-end and back-end. On the back-end, I created category-specific products and stored them in localStorage. For the front-end, I designed responsive e-commerce webpages, including category pages, product listings, a shopping cart, and a checkout system. I also implemented key functionalities such as searching, sorting, adding products to the cart, and managing the checkout process.

Grocery App

Technology : Api, Axois Package

Functionality : I developed the home page of a grocery app and displayed products using a fake API. The home page includes a clean, user-friendly interface where products are fetched dynamically from the fake API and showcased with essential details such as name, price, and category.
